Micro T·A·C 7500

Big performance in a small package

Trust Motorola to do the business.

The Micro T·A·C 7500 is essential for the executive on the move. It will slip easily

into a pocket, handbag or briefcase and is very comfortable to use.

In control. Motorola's *Personality*TM software makes the International 7500 simple to use. Create your own menus; store your most frequently used numbers with ease; select your preferred ringer tone; access your message service - it's all done at the touch of the 'OK' button.

Your SIM card is your GSM identity.

Motorola uses large format SIM cards, they are easier to use and are rapidly becoming the international standard size with a whole new range of GSM services built-in.

Who's calling? Caller Line Identity tells

you which number is calling you before you answer and allows you to choose whether or not your own number

is presented when you send a call.

The key features

- *Personality*TM - you can match the performance of your phone to the way you work
- Caller Line Identity
- One-touch 'turbo' dialling
- Simple international network selection
- Large SIM card - for easy management and access to new GSM services
- Last ten numbers dialled and received - for fast redialling and response
- Call diversion and barring - to ensure you never miss a call, unless you want to
- Fax and data transmission capabilities - via a standard PCMCIA interface
